INSTALLATION

Memory Card Insert

Please ensure Micro SD Card Memory card is inserted correctly.

Product Installation

- 1 Ensure the Front Camera is fixed with the Mount Bracket provided.
- 2 Insert the memory card into memory card slot, and peel off the adhesive tape on the bracket.
- 3 Install the front camera at the front windshield by adjusting the angle.
- 4 Front angle may be different depending on car brand & model. For general vehicle, install the front angle vertically.

DR 850 DRIVING VIDEO RECORDER INSTRUCTION MANUAL

INSTALLATION

Product Installation

- 5 Connect wire cable to fuse box terminal in the car before connecting to dash camera.
- 6 Peel off the adhesive tape on the rear camera and place it on the rear windshields of the car.
- 7 It is recommended that you install the power cable towards the driver seat and rear camera connection cable towards the passenger seat to prevent interference of car navigation GPS.
- 8 To enable Parking Mode, do ensure proper wiring is done (check with installer).
- 9 Setting the dash camera to "acc" will disable parking mode and over-write parking mode settings in the mobile application.

13

PRECAUTION

Voltage Issues

- Please use recommended/stable voltage only. Otherwise, improper use may cause product failure and fire accidents, explosion or damage to the vehicle.

Installation

- Do not mount dash cam on areas where it obstructs the driver's view or the operation of the vehicle itself.
- Do not install the device on colored or heavily tinted windshield as it may affect video quality.

Usage and General Management

- Image quality could deteriorate when the temperature of the device exceeds the optimal operating temperature.
- Please check whether the device is functioning before driving a car.
- Do not remove SD card or turn off the power cable during firmware update, it may cause malfunction or loss of data.
- For safety, do not operate dash cam while driving.

Memory Card and Precaution

- SD memory card stores information in flash memory, which has a limited service life. Periodic care and checking is required.
- The device must be turned off when ejecting the memory card. It may cause loss of data or malfunction of the memory card when user forces switch-off while it is running.
- Video data may be damaged due to a defective memory card or shorten lifetime of memory card.
- Genuine memory card is recommended to avoid error, incompatibility or malfunction of the product.
- Please check your memory card once every month for maintenance and stability. It is recommended that you check memory card through SD formatter program(www.sdcard.org).
- Please do not remove the SD card while the device is running or when it is being turned off.

15
